

## *Insurance firm develops digital platform*

10.26.08

EnTitle Insurance Co., which has been underwriting title insurance for 30 years, has developed a digital platform — EnTitle Direct — to educate and help consumers monitor their home closings and save on their title insurance.

In Maryland, EnTitle Direct's premium rates can be as much as 35 percent lower than those offered by other title insurance companies, resulting in hundreds or even thousands of dollars in savings on closing costs for home purchases and refinances.

“Numerous federal and state regulatory authorities and consumer advocates are vocally critical of the high cost consumers pay for title insurance and a real estate process that keeps consumers in the dark,” said Timothy Dwyer, president and CEO of EnTitle Direct Group. “EnTitle Direct was created for consumers by consumers to address these concerns.”
